

# Tringa totanus

## COMMON REDSHANK

**SPEC 2** (1994: 2) **Status** Declining  
**Criteria** Moderate continuing decline  
**European IUCN Red List Category** —  
**Criteria** —  
**Global IUCN Red List Category** —  
**Criteria** —

*Tringa totanus* is a widespread breeder across much of Europe, which constitutes >50% of its global breeding range. Its European breeding population is large (>280,000 pairs), but underwent a moderate decline between 1970–1990. Although several populations—notably sizeable ones in Russia and Norway—were stable or increased during 1990–2000, the species continued to decline across much of its European range, and underwent a moderate decline (>10%) overall. Consequently, it is evaluated as Declining.
