Streptopelia decaocto is a widespread resident across much of Europe, which accounts for less than half of its global range. Its European breeding population is very large (>4,700,000 pairs), and was stable between 1970–1990. Although there were declines in several countries during 1990–2000, particularly in the north of its European range, key populations in France, Romania, Russia and Turkey increased or were stable, and the species increased overall. Consequently, it is evaluated as Secure.

Country	Breeding pop. size (pairs)	Year(s)	Trend	Mag.%	References
Albania	5,000 – 10,000	02	(+)	(0–19)	
Andorra	0 – 6	02	+	N	1,3
